SCHEDULE B

Statistical Classification of
DOMESTIC AND FOREIGN COMMODITIES
Exported from the United States

Includes

Code Classification of Countries (Schedule C)

and

Code Classification of U.S. Customs Districts and Ports (Schedule D)

JANUARY 1, 1965, EDITION

**UNITED STATES GOVERNMENT PRINTING OFFICE
WASHINGTON**

STATISTICAL CLASSIFICATION OF DOMESTIC AND FOREIGN COMMODITIES
EXPORTED FROM THE UNITED STATES

DEPARTMENT OF COMMERCE
OFFICE OF THE SECRETARY

Washington, January 1, 1965

To Exporters, Collectors of Customs, Postmasters, and Others Concerned:

Beginning with the 1st day of January, 1965, the annexed schedule will govern in the classification of domestic and foreign commodities exported from the United States, Puerto Rico, or the Virgin Islands of the United States to foreign countries, or to United States outlying areas, and for commodities shipped between the United States and Puerto Rico. The Shipper's Export Declaration is the standard official document required in the exportation of commodities from the United States. Before shipments may leave this country, whether by vessel, rail, air, car, vehicle, or other method of transportation, the U.S. Government requires that specific information for statistical purposes be shown on a Shipper's Export Declaration, Commerce Form 7525-V (including 7525-V-Alternate) or Commerce Form 7513 and that such declaration be filed by the shipper or his agent with a United States Collector of Customs at the U.S. port of export. If shipped by parcel post, such declaration must be filed with the postmaster at the post office from which the merchandise is shipped.

- I. Shipper's Export Declaration, Commerce Form 7525-V, (or 7525-V-Alternate) should be used for all shipments to foreign countries and to U.S. outlying areas and between the United States and Puerto Rico except those shipments for which Commerce Form 7513 is required. (See II, below)

Form 7525-V is to be used for both:

- a. Domestic merchandise (merchandise which is the growth, produce, or manufacture of the United States, or imported merchandise which has been changed in condition in the United States, including merchandise withdrawn from bonded manufacturing warehouses for exportation and merchandise exported with benefit of drawback) and
- b. Foreign merchandise (imported merchandise which has not been changed in condition in the United States, including merchandise withdrawn from bonded storage warehouses for exportation).

- II. Commerce Form 7513, Shipper's Export Declaration for In-Transit Goods should be used for all merchandise:

- a. Shipped in transit through the United States, Puerto Rico, or the Virgin Islands of the United States.
- b. Transshipped in ports of the United States, Puerto Rico, or the Virgin Islands of the United States.
- c. Exported from General Order Warehouse.
- d. Rejected and exported.
- e. Exported from Foreign Trade Zones.

Reproductions of the front and the reverse sides of the Shipper's Export Declaration Commerce Form 7525-V, (Revised July 1962) are presented on the following pages.

SHIPPER'S EXPORT DECLARATION

OF SHIPMENTS FROM THE UNITED STATES
Export Shipments Are Subject To U.S. Customs Inspection

READ CAREFULLY THE INSTRUCTIONS ON BACK TO AVOID DELAY AT SHIPPING POINT
For shipments to foreign countries, the export declaration (a) must be presented to and authenticated by the Collector of Customs before the goods are placed on pier or dock or other place of loading for the purpose of exporting by water or air; (b) must be presented to and authenticated by the Collector prior to exportation where the goods are exported by other means.

Declarations Should Be Typewritten Or Prepared In Ink

Do Not Use This Area

District

Port

Country (For customs
use only)

1. FROM (U.S. Port of Export)

2. METHOD OF TRANSPORTATION (check one):

☐ Vessel
(incl. ferry)

☐ Air

☐ Other (Specify) _____

2a. EXPORTING CARRIER (If vessel, give name of ship, flag and pier number. If air, give name of airline.)

3. EXPORTER (Principal or seller—licensee)

ADDRESS (Number, street, place, state)

4. AGENT OF EXPORTER (Forwarding agent)

ADDRESS (Number, street, place, state)

5. ULTIMATE CONSIGNEE

ADDRESS (Place, country)

6. INTERMEDIATE CONSIGNEE

ADDRESS (Place, country)

7. FOREIGN PORT OF UNLOADING (For vessel and air shipments only)

8. PLACE AND COUNTRY OF ULTIMATE DESTINATION (Not place of transshipment)

(9) MARKS AND NOS.	(10) NUMBER AND KIND OF PACKAGES, DESCRIPTION OF COMMODITIES, EXPORT LICENSE NUMBER, EXPIRATION DATE (OR GENERAL LICENSE SYMBOL) (Describe commodities in sufficient detail to permit verification of the Schedule B commodity numbers assigned. Do not use general terms. Insert required license information on line below description of each item)	(11) SHIPPING (Gross) WEIGHT IN POUNDS * (required for vessel and air shipments only)	(12) SPECIFY "D" OR "F"	(13) SCHEDULE B COMMODITY No.	(14) NET QUANTITY IN SCHEDULE B UNITS (State unit)	(15) VALUE AT U. S. PORT OF EXPORT (Selling price or cost if not sold, including in- land freight, insur- ance and other charges to U. S. port of export) (Nearest whole dollar; omit cents figures)

16. WAYBILL OR MANIFEST No. (of Exporting Carrier)

17. DATE OF EXPORTATION (Not required for shipments by vessel)

18. THE UNDERSIGNED HEREBY AUTHORIZES _____

TO ACT AS FORWARDING AGENT FOR EXPORT CONTROL AND CUSTOMS PURPOSES.

(Name and address—Number, street, place, State)

EXPORTER _____ BY (DUTY AUTHORIZED

OFFICER OR EMPLOYEE)

► 19. I CERTIFY THAT ALL STATEMENTS MADE AND ALL INFORMATION CONTAINED IN THIS EXPORT DECLARATION ARE TRUE AND CORRECT. I AM AWARE OF THE PENALTIES PROVIDED FOR FALSE REPRESENTATION. (See Paragraphs I (c), (e), on reverse side.)

Signature _____
(Duly authorized officer or employee of exporter or named forwarding agent)

For _____
(Name of corporation or firm, and capacity of signer; e.g., secretary, export manager, etc.)

Address _____

► Declaration should be made by duly authorized officer or employee of exporter or of forwarding agent named by exporter.

* If shipping weight is not available for each Schedule B item listed in column (13) included in one or more packages, insert the approximate gross weight for each Schedule B item. The total of these estimated weights should equal the actual weight of the entire package or packages.

† Designate foreign merchandise (reexports) with an "F" and exports of domestic merchandise produced in the United States or changed in condition in the United States with a "D." (See instructions on reverse side.) CARRIERS, FORWARDERS AND EXPORTERS ARE REMINDED THAT IF A DESTINATION CONTROL STATEMENT IS REQUIRED ON A SHIPPER'S EXPORT DECLARATION COVERING A GIVEN SHIPMENT, SUCH STATEMENT MUST ALSO APPEAR ON ALL COPIES OF THE BILL OF LADING AND COMMERCIAL INVOICE. (See Comprehensive Export Schedule.)

Customs Authentication (For Customs use only.)

FILE NO. (For Customs use only.)

INSTRUCTIONS FOR THE USE OF THE YELLOW SHIPPER'S EXPORT DECLARATION

(Commerce Form 7525-V)

(Follow Carefully to Avoid Delay at Shipping Point)

I. PROVISIONS OF LAW AND REGULATIONS.

(a) Vessels shall not be cleared for foreign ports until export declarations covering the cargo, or its parts have been delivered to the collector at the point of exportation by the owners, shippers, or consignors thereof. Similar provisions apply to exportations by rail, air, vehicle, or ferry.

(b) A declaration presented to a Collector of Customs or Postmaster and used to effect an exportation of any commodity for which a validated export license or a general license is required, constitutes a representation by the exporter (1) that all statements made and information set forth in the declaration have been furnished by him or on his behalf for the purpose of effecting an exportation in accordance with the export control regulations; (2) that the exportation of the commodity described in the declaration is authorized under the general or validated export license identified in the declaration; (3) that the statements contained in the declaration are identical in all respects with the contents of the validated export license, or the terms, provisions and conditions of the applicable general license; and (4) that all other terms, provisions, and conditions of the export control regulations applicable to the exportation have been met.

(c) It is unlawful under the export regulations and the export control law, in addition to the provisions of any other law, for any person, whether or not situated in the United States, knowingly to make any false or misleading representation, statement, or certification, or to falsify or conceal any material fact, whether directly to the Bureau of International Commerce, the Bureau of the Census, any collector of customs, or an official of any other United States agency, or indirectly through any other person or foreign government agency or official, for the purpose of or in connection with effecting an exportation from the United States, or the reexportation, transshipment or diversion of any such exportation, or the issuance, or maintenance in effect of any document relating to export control, or in the course of an investigation or other action instituted under the authority of the Export Control Act of 1949, as amended. Any person violating the provisions of law and/or the Export Control Regulations referred to herein is subject to fine of not more than \$10,000 or imprisonment for not more than 5 years, or both (Act of June 25, 1948, c. 645, 62 Stat. 749; 18 U.S.C. Sec. 1001); and/or to fine of up to five times the value of the exports involved or \$20,000, whichever is greater, or imprisonment for not more than 5 years, or both (Export Control Act of 1949, as amended, Sec. 5; 63 Stat. 8; 50 U.S.C. App. Sec. 2025).

(d) Commodities which are intended to be, or are being, or have been exported in violation of the export control law and the regulations promulgated thereunder, are subject to seizure, detention, condemnation and sale under the Act of June 15, 1917, Ch. 30, Title VI, Sec. 1, 40 Stat. 223; 22 U.S.C. Sec. 401, as amended.

(e) It is a criminal offense for any person to knowingly make to the Bureau of the Census or the Bureau of International Commerce any false or misleading statement or representation relating to information on the Shipper's Export Declaration, subject to a maximum penalty of \$10,000 fine or imprisonment for 5 years, or both (18 U.S.C. Sec. 1001).

(f) Shipper's export declarations must also be filed for shipments between the United States and its outlying areas.

(g) For instructions regarding the use of this form for parcel-post exportations, see current United States Postal Manual, Chapter 2. One copy of the declaration should be mailed by postmaster to Foreign Trade Branch, Economic Operations Division, Bureau of the Census, 434 Customhouse, New York 4, N.Y.

II. SHIPPER'S EXPORT DECLARATIONS (Commerce Form 7525-V).

(a) Must be made in triplicate for shipments by vessel, air, rail, car, vehicle, and ferry for all merchandise shipped to foreign countries including Canada, where that country is not the final destination. For shipments finally destined to Canada, and between the United States and its outlying areas, the declarations must be made in duplicate. Under export control regulations, additional copies may be required by the Bureau of International Commerce. (Commerce Form 7525-V should not be filed for merchandise shipped in-transit through the United States from one foreign country to another. In lieu thereof, "Shipper's Export Declaration for in-transit Goods" on Commerce Form 7513 should be filed.)

(b) The exporter or, his forwarding agent (duly authorized by a general power of attorney on file in the Customhouse or by specific power of attorney in item 18 of the export declaration form) or a duly authorized officer or employee of either must sign the original copy of the declaration in the space provided for signature. The name of the corporation or firm, and the capacity of the signer (secretary, export manager, etc.) must be set out in the line captioned "For" in item 19. Oath is not required on the declaration, but the provisions of law and export control regulations applicable to false representations, as indicated in paragraph I (c) and (e), above, are fully applicable.

(c) Designation of agent must be in writing and signed by the exporter on declaration or in separate document providing similar authorization, which shall be filed with the collector. Export control regulations define a "forwarding agent" as a person authorized by a named exporter to perform for the exporter actual services which facilitate exportation of the commodities described in the declaration, such as preparing the declaration, attending to clearance of the shipment by submission of documents to the Collector of Customs or export control officers, securing cargo space or delivering the commodities to the exporting carrier, obtaining bills of lading in connection with the exportation, and attending to the formalities of consular invoices, certificates of origin, and other like documents; but such person need not be regularly engaged in the freight forwarding business.

(d) An authenticated declaration evidences the existence of a validated export license or an exportation permitted by an applicable general license. It is a violation of the export control law and regulations for any person to receive, use, alter, or assist in or permit the use or alteration of, any export declaration which has been authenticated by a Collector of Customs in connection with the exportation of any commodity under a general or validated export license, for the purpose of facilitating or effecting any exportation other than that set forth in such declaration and in accordance with the terms, provisions, and conditions thereof. Any person receiving an authenticated declaration showing evidence of unauthorized change, alteration, or amendment may not take any action to facilitate the exportation, but must report the facts to the nearest Collector of Customs and surrender the declaration to such Collector.

(e) In the case of exportations subject to the export control law and regulations, the original and two copies (or additional copies if required or authorized by export control regulations) of the declaration submitted to the Collector of Customs at the port of exit by the exporter, his named duly authorized forwarding agent (or a duly authorized officer or employee of either) will be authenticated by the Collector. The Collector will retain the original and one copy, and will return one (or more where required or authorized) authenticated copy to the exporter or such agent. One copy so returned shall be delivered by the exporter, or his agent, to the exporting carrier for attachment to the outward manifest. The additional copy or copies, when required or authorized, shall be used by the exporter in conformity with export control regulations. All copies not used shall be returned to the Collector. The statistical (manifest) copy of the declaration will be forwarded by the Collector to the Bureau of the Census. Collectors will not authenticate a declaration which has been altered, changed, or amended, except as and to the extent authorized by the export control regulations.

(f) For shipments by rail to Mexico and Canada separate declarations shall be prepared for each carload.

(g) Shipper's Export Declarations are for use solely for official purposes authorized by the Secretary of Commerce. Use for unauthorized purposes is not permitted. In accordance with the provisions of the Export Control Act (Title 50, U.S.C. App., 2026c) information from the export declarations will be published or disclosed only when the Secretary has determined that the withholding thereof is contrary to the national interest.

III. EXPLANATION OF TERMS.

ITEM 1. *United States Port of Export*.—Insert United States Customs port of exportation in terms of Schedule D, "Code Classification of Customs Districts."

ITEM 2. *Method of Transportation*.—Check whether exported by vessel (including ferry), air, or other means of transportation. If "Other," specify; i.e., rail, truck, etc.

ITEM 2a. *Exporting Carrier*.—In addition to checking the method of transportation in item 2, specify here the name of the exporting carrier. If vessel, give name of ship, flag, and number or name of pier at which the goods were laden. If air, give name of airline. If "Other" (rail, vehicle, etc.), give name of carrier and identification by number or other designation.

ITEM 3. *Exporter*.—Exporter named shall be licensee named in the validated export license or person entitled to make the exportation under applicable general license in conformity with export control regulations.

ITEM 4. *Agent of Exporter*.—State name of duly authorized forwarding agent of named exporter. See paragraph II (c).

ITEM 5. *Ultimate Consignee*.—Ultimate consignee (whether by sale in U.S. or abroad, or by consignment) shall be person named as ultimate consignee in validated export license or authorized to be ultimate consignee under applicable general license in conformity with export control regulations.

ITEM 6. *Intermediate Consignee*.—Intermediate consignee shall be person named as such in validated export license or authorized to act as such under applicable general license and in conformity with export control regulations. If none, state "none." Intermediate consignee should be inserted if known at time of authentication.

ITEM 7. *Foreign Port of Unloading*.—Foreign port of unloading (i.e., foreign port at which the merchandise will be unladen from the exporting carrier specified in item 2a) should be shown for vessel and air shipments only.

ITEM 8. *Place and Country of Ultimate Destination*.—The final place and country of destination, not the place of transshipment, should be shown in the space provided for "Place and Country of Ultimate Destination." Special care should be taken to give the final place and country of destination for goods shipped through Canada, United Kingdom, Canal Zone, Chile, Peru, or other seaboard countries for transshipment to other countries, such as through Chile or Peru, destined for Bolivia.

IV. DESCRIPTION OF ARTICLES, QUANTITIES, AND VALUES.

COLUMN 9.—Insert marks and numbers.

COLUMN 10.—Insert number and kinds of packages, description of commodities, export license number, and expiration date, or general license symbol. Commodities must be described by nature and quantity in sufficient detail to permit verification of the Schedule B commodity numbers assigned. The description of the articles must be definite and complete, preferably the common commercial name of the specific article, and must conform with that set forth in the validated export license or with the requirements of the applicable general license. General terms such as "dry goods," "groceries," "meats," etc., are not sufficient. Catalog numbers or other characteristic trade identifications should be used where they will aid such description. Identification or description by trademark or brand name should be avoided where possible.

COLUMN 11.—Insert gross weight in pounds for vessel and air shipments only.

COLUMN 12.—Specify whether of domestic or foreign origin. Exports of domestic merchandise include commodities which are the growth, produce, or manufacture of the United States. Exports of foreign merchandise include commodities of foreign origin which entered the United States as imports, and which, at the time of exportation, are in the same condition as when imported. Commodities of foreign origin which have been changed in the United States from the form in which they were imported, or which have been enhanced in value by further manufacture in the United States, are considered as "domestic" commodities.

The above definition of the distinction between domestic and foreign merchandise is intended only for use in reporting column (12) on this export declaration and is intended for statistical purposes only.

COLUMN 13.—Insert the Schedule B commodity code number. (See Instruction VII (a) below.)

COLUMN 14.—Insert the net quantity in Schedule B unit. State the unit of quantity shown; i.e., pounds, square yards, etc.

COLUMN 15.—Insert the dollar value at time and place (U.S. port) of export (omit cents figures). Value stated should be the selling price, or cost if not sold, including inland freight, insurance, and other charges to border point, seaport, or exporting airport, Ocean freight, marine insurance, and other charges incurred beyond the U.S. port of exportation should be excluded.

ITEM 16.—For convenience of exporter, to be inserted if desired.

ITEM 17.—To be inserted by Collector of Customs.

V. SIGNATURES.

ITEMS 18 and 19.—See paragraphs II (b) and II (c) of these instructions.

VI. FOREIGN COMMERCE STATISTICAL REGULATIONS—EXPORT CONTROL REGULATIONS.

For more detailed information regarding the preparation of the export declaration, refer to the Regulations for Collection of Statistics of Foreign Commerce and Navigation of the United States (Title 15, Ch. I, Part 30, Code of Federal Regulations), copies of which may be purchased from the Superintendent of Documents, U.S. Government Printing Office, Washington 25, D.C. Information concerning export control law and regulations may be obtained from the Bureau of International Commerce, Washington 25, D.C., or from the Department of Commerce Field Offices.

VII. SCHEDULE B AND BLANKS.

(a) Schedule B, Statistical Classification of Domestic and Foreign Commodities Exported from the United States, may be purchased from the Superintendent of Documents, Government Printing Office, Washington 25, D.C., local Collectors of Customs, and the Department of Commerce Field Offices.

(b) Shipper's Export Declaration blanks may be purchased from the Superintendent of Documents, Government Printing Office, Washington 25, D.C., local Collectors of Customs, and Department of Commerce Field Offices located in principal cities. They may be printed by private parties provided they conform to the official form in size, wording, color, and quality (weight) of paper stock, and arrangement. An authenticated Shipper's Export Declaration may not be reproduced in any form.

CORRECT WAY TO FILL OUT THE SHIPPER'S EXPORT DECLARATION

1. WHAT IS THE SHIPPER'S EXPORT DECLARATION?

The Shipper's Export Declaration, (Commerce Form 7525-V), is a joint Bureau of the Census—Bureau of International Commerce form, which is used for compiling official United States export statistics and for enforcing United States export control laws.

Commerce Form 7525-V-Alternate is a variation of the basic Shipper's Export Declaration. It was designed for simultaneous preparation with various other shipping documents commonly used, such as the dock receipt and the short form bill of lading. It can be used in lieu of the regular Form 7525-V without limitation.

When more horizontal lines than the number provided on the Shipper's Export Declaration form are required to list all of the merchandise covered by the declaration, the Continuation Sheet to the Shipper's Export Declaration (also designated Commerce Form 7525-V) should be used for the second and succeeding pages. In lieu of the Continuation Sheet, additional copies of the Shipper's Export Declaration form, with no portion torn off or removed may be used as Continuation Sheets.

2. WHEN IS THE SHIPPER'S EXPORT DECLARATION REQUIRED?

The Shipper's Export Declaration must be filed for all commodities, unless specifically exempt, shipped to foreign countries or areas from the United States, Puerto Rico, and the Virgin Islands, as well as for shipments between the United States and Puerto Rico, and for shipments to the possessions from the United States and Puerto Rico, regardless of the method of transportation. See item 22 for a list of the most common exemptions from Shipper's Export Declaration filing requirements.

3. WHO SHOULD PREPARE AND SIGN THE SHIPPER'S EXPORT DECLARATION?

The Shipper's Export Declaration must be prepared and signed by the shipper, owner, or consignor, or his properly authorized agent. If the Shipper's Export Declaration is prepared by an agent, his authority to sign such declaration must be in the form of a properly executed power-of-attorney signed by the shipper, owner, or consignor, on file in the Customs office where the Shipper's Export Declaration is to be presented, or in the less formal written authorization printed on the export declaration form.

The Shipper's Export Declaration should be type-written or prepared in ink or other permanent medium (except indelible pencil). Duplicating processes, such as ditto and hectograph, as well as the overprinting of selected items of information, are acceptable. The signature may be executed in ink or by signature stamp.

4. HOW MANY COPIES OF THE SHIPPER'S EXPORT DECLARATION SHOULD BE PREPARED?

Three copies of the Shipper's Export Declaration are required for shipments to all foreign countries, except Canada, and for shipments through Canada destined to a third country; two copies are required for shipments to Canada and to nonforeign areas; only one copy is required for shipments by mail to all destinations. Additional copies in some cases may be required for export control purposes.

5. HOW SHOULD METHOD OF TRANSPORTATION BE DESIGNATED IN ITEM 2?

Check the appropriate box to indicate whether the shipment is being exported by vessel (including ferry), air, or other means of transportation. If "Other," specify; i.e., rail, truck, etc. "Other" should be checked for exported aircraft being flown away, vessels exported under their own power or afloat, or for other vehicles exported other than aboard another carrier, and the manner in which exported should be specified, e.g., "flown away," "in tow," etc.

6. WHAT SHOULD BE ENTERED AS THE PORT OF EXPORT IN ITEM 1?

The Customs port at which the land carrier crosses the border into foreign territory or where the exporting vessel or aircraft is loaded with the cargo covered by the specific export declaration is the port of export for statistical purposes and must be entered on the Shipper's Export Declaration in terms of the current edition of Schedule D, Code Classification of United States Customs Districts and Ports, except that for postal shipments, the name of the post office where the package is mailed should be inserted.

7. HOW SHOULD THE EXPORTING CARRIER BE DESIGNATED IN ITEM 2a?

The following details must be given according to the type of exporting carrier: (a) the name and flag of the vessel and number or name of the pier at which the goods are laden for shipments by vessel; (b) the name of the airline for shipments by

air; and (c) the name and number, or other available designation, for shipments other than by vessel or air.

8. WHAT DETERMINES THE NAMES OF THE EXPORTER, AGENT, CONSIGNEE, ETC.?

Exporter named shall be licensee named in the validated export license or person entitled to make the exportation under applicable general license in conformity with export control regulations. Similarly intermediate and ultimate consignee shall be the persons named as such in the validated export license or authorized to act as such under applicable general license in conformity with export control regulations. If the exporter has duly authorized an agent to prepare the Shipper's Export Declaration and/or to perform other services which facilitate exportation of the commodities described in the declaration, the name and address of such agent should be shown.

9. WHAT IS TO BE SHOWN AS FOREIGN PORT OF UNLOADING IN ITEM 7?

The foreign port and country at which the merchandise will be unladen from the exporting carrier should be shown in this space for vessel and air shipments only.

10. WHAT SHOULD BE ENTERED AS THE COUNTRY OF DESTINATION IN ITEM 8?

In general, the final place and country of ultimate destination as known to the exporter at time of shipment must be reported in terms of the current edition of Schedule C, Classification of Country Designations Used in Compiling the United States Foreign Trade Statistics. The "country of destination" is the country in which the goods are to be consumed or further processed or manufactured. If the ultimate destination of the goods is not known, the last known country to which the goods are being shipped in their present form should be shown.

For vessels or carriers sold foreign, the country of new ownership is to be entered as the country of destination.

11. WHAT MARKS AND NUMBERS SHOULD BE SHOWN IN COLUMN (9)?

For purposes of identification of the Shipper's Export Declaration with the merchandise it covers, the marks, numbers, or other identification on the packages should be inserted.

12. HOW SHOULD MERCHANDISE BE DESCRIBED IN COLUMN (10)?

The merchandise must be described in sufficient detail to permit the verification of the Schedule B commodity number, as provided in the current edition of Schedule B, Statistical Classification of Domestic

and Foreign Commodities Exported from the United States. The name of the commodity, in terms which can be identified or associated with the language used in Schedule B (usually the commercial name of the commodity), and any and all characteristics of the commodity which distinguish it from commodities of the same name covered by other Schedule B classifications shall be clearly and fully stated. Careful reference to the Schedule B classification scheme, for related commodities as well as for the commodity being shipped, is necessary in order to establish which particular characteristics must be stated in the description to permit verification of the correct Schedule B commodity number, and to eliminate any question that some other commodity number might apply. The assignment of the Schedule B number is a separate requirement, and the furnishing of the correct Schedule B commodity number does not relieve the exporter of furnishing, in addition, a complete and accurate commodity description in accordance with this requirement. If the shipment is moving under a validated license, the description shown on the export declaration shall conform with that shown on the validated export license. However, where the description on the license does not state all of the characteristics of the commodity which are needed to completely verify the commodity number, as described above, the missing characteristics, as well as the description shown on the license, shall be stated in the commodity description on the Shipper's Export Declaration.

For Schedule B commodity numbers for which the classification description in Schedule B is followed by instructions such as "Specify by name," "State species," etc., the specific name of the item, or a further identifying description of the item in addition to the information required above shall be shown. Where a single Shipper's Export Declaration covers more than one item classifiable under a single one of the classifications carrying the "Specify by name" or similar requirement, separate quantities, values, and shipping weights for the individual items are not required by this part. However, each item should be separately enumerated, except that if more than five items are involved, all classifiable under one Schedule B number, only the five items of greatest value in the classification are required to be separately enumerated.

13. HOW SHOULD SHIPPING WEIGHT BE SHOWN IN COLUMN (11)?

The gross shipping weight in pounds, including the weight of immediate containers, should be shown for all shipments by vessel and air. If gross shipping weight information is not available for each individual Schedule B item for the reason that commodities covered by more than one Schedule B number are contained in the same package, approximate weights, estimated as accurately as is practicable should be shown for each Schedule B item in the package.

14. WHAT IS MEANT BY "D" OR "F" IN COLUMN (12)?

Foreign goods must be shown separately from goods of domestic production, and for this purpose, domestic merchandise is identified by the designation "D" and foreign merchandise by "F".

Exports of foreign merchandise include those commodities which are the growth, produce, or manufacture of foreign countries, which entered the United States as imports and which at the time of exportation have undergone no change in form or condition or enhancement in value by further manufacture in the United States, Puerto Rico, or the Possessions.

Exports of domestic merchandise include those commodities which are the growth, produce, or manufacture of the United States, Puerto Rico, or the Possessions (including commodities incorporating foreign components), and those articles of foreign origin which have been enhanced in value or changed from the form in which imported by further manufacture or processing in the United States, Puerto Rico, or the Possessions.

15. HOW CAN THE SCHEDULE B COMMODITY NUMBER BE OBTAINED?

Consult the current edition of Schedule B "Statistical Classification of Domestic and Foreign Commodities Exported from the United States." Directions for locating the correct Schedule B commodity number will be found in the introduction to Schedule B. Shippers may also consult their local Collectors of Customs, Department of Commerce Field Offices (located in principal cities), the New York Office, Foreign Trade Branch, Economic Operations Division, Bureau of the Census, 434 Customhouse, New York, New York, 10004 or write to the Foreign Trade Division, Bureau of the Census, Washington, D.C., 20233, for assistance in determining the correct Schedule B commodity numbers for their shipments. Schedule B may be purchased from the Superintendent of Documents, Government Printing Office, Washington, D.C., and/or from Department of Commerce Field Offices. Local Collectors of Customs may also stock copies of Schedule B for sale.

16. HOW SHOULD NET QUANTITY BE SHOWN IN COLUMN (14)?

Consult the current edition of Schedule B (see question 15). Where a unit of quantity is specified in Schedule B for the commodity number in which the item is classified, net quantity exported must be reported in the specified unit, and the unit in which reported should be indicated following the net quantity figure. If no unit of quantity is specified in Schedule B for a numbered classification, but a validated export

license for the item specifies a unit of quantity, the net quantity should be reported on the declaration in terms of the unit of quantity specified in the validated export license. In stating quantities, fractions of less than one-half should be ignored, and fractions of one-half or over should be considered a whole unit. Where neither Schedule B nor an applicable validated license presents a unit of quantity for the item, net quantity should not be shown, and a dash " — " should be entered in the "net quantity" column.

17. HOW SHOULD VALUE BE SHOWN IN COLUMN (15)?

A separate value must be given for each item requiring a separate Schedule B commodity number (except for a few commodity numbers for which Schedule B specifically requires quantity only), or each group of items bearing the same commodity number. The dollar value at United States port of export should be given. This value should be the selling price, or cost if not sold, including inland freight, insurance, and other charges to border point or seaport. It should not include ocean freight, marine insurance, or other charges incurred beyond the United States port of exportation.

Where exact information as to the amount of inland freight charges, etc., is not available, estimates are acceptable. Inland freight charges, etc., should not be shown separately on the declaration, but should be reflected, together with the selling price (or cost, if not sold), in a single value figure entered in column (15) as described above. In stating values, fractions of less than one-half dollar should be ignored, and fractions of one-half dollar or over should be stated as a whole dollar. Cent figures should be omitted.

18. WHAT SHOULD BE ENTERED AS THE DATE OF EXPORTATION?

Information as to date of exportation, when required, will be entered by Collectors of Customs.

19. WHAT SHOULD BE DONE WITH THE SHIPPER'S EXPORT DECLARATION WHEN COMPLETED?

Unless otherwise provided in the regulations of the Census Bureau and the Office of Export Control, the Shipper's Export Declaration in the required number of copies should be presented in person by the exporter or his authorized agent to the Collector of Customs at the United States port of export prior to exportation of the merchandise. (For shipments by mail, the declaration should be filed with the postmaster at the time of mailing.) For shipments from an interior point, the declaration, prepared and signed by the exporter or his agent, may be given to the carrier for presentation to Customs at the port of export.

x

20. HOW SHOULD CORRECTIONS BE MADE?

Corrections, amendments, or cancellations of data reported on Shipper's Export Declarations should be effected by means of the Shipper's Export Declaration Correction Form (available free from Collectors of Customs) which must be filed with the Collector of Customs or the Postmaster where the declaration was originally presented.

21. WHERE CAN THE SHIPPER'S EXPORT DECLARATION FORMS BE OBTAINED?

The regular declaration and its continuation sheet can be purchased for a nominal price from Collectors of Customs, Department of Commerce Field Offices, or the Superintendent of Documents, Government Printing Office, Washington, D.C. 20402. The alternate form must be privately printed; free samples are available from the Foreign Trade Division, Bureau of the Census, Washington, D.C. 20233. Any of the Shipper's Export Declaration forms may be privately printed provided they conform strictly to the official form in size, wording, color, quality (weight) of paper stock, and arrangement, including the instructions on the reverse side.

22. WHAT ARE SOME OF THE KINDS OF SHIPMENTS FOR WHICH SHIPPER'S EXPORT DECLARATIONS NEED NOT BE FILED?

Shipper's Export Declarations are generally required for all shipments unless specifically exempt. (See question 2.) A partial list of the kinds of shipments for which Shipper's Export Declarations are not required when such shipments are not moving under a validated export license is shown below.

- a. Shipments by mail where either the shipper or the addressee is not a business concern.
- b. Shipments by mail valued less than \$50.
- c. Shipments of technical data by mail (regardless of whether or not a validated export license is required).
- d. Shipments by mail where the goods are not exported for commercial consideration.
- e. Shipments by mail of catalogs, instruction books, and other advertising matter, or of newspapers, magazines and periodicals.
- f. Shipments of diplomatic pouches and their contents.
- g. Shipments of human remains and accompanying appropriate receptacles and flowers.
- h. Shipments from one point in the United States to another point thereof by routes passing through Canada or Mexico, and shipments from one point in Canada or Mexico to another point thereof by routes passing through the United States.
- i. Shipments of baggage, personal effects, and tools of trade, of persons leaving the United States, provided such baggage, personal effects, and tools of trade (i) include only such articles as are owned by such person or member of his immediate family; (ii) shall be in his possession at the time of or prior

to his departure from the United States (iii) are necessary and appropriate and intended for the personal use of such person or his immediate family; and (iv) are not intended for sale, and provided further that such baggage, personal effects and tools of trade are not moving as cargo on a bill of lading.

j. Shipments of all commodities, whether shipped commercially or through government channels, consigned to the United States armed services, including shipments to armed services exchange systems.

k. Shipments encompassed by Office of Export Control General License GIFT.

l. Shipments, except by water or air, to Canada and to Mexico valued less than \$50 provided such shipments are not moving as cargo on a bill of lading.

23. HOW CAN I FIND THE ANSWERS TO ANY FURTHER QUESTIONS I MAY HAVE ON SHIPPER'S EXPORT DECLARATIONS?

The reverse side of the Shipper's Export Declaration, reproduced on page 2, contains additional instructions. For further information, consult your local Collector of Customs or Department of Commerce Field Office. The Foreign Trade Division, Bureau of the Census, Washington, D.C. 20233, and the New York Office, Foreign Trade Branch, Economic Operations Division, Bureau of the Census, Room 434 Customhouse, New York, New York 10004, will also be able to answer any inquiries. Complete information regarding Census (statistical) requirements for the preparation and filing of the Shipper's Export Declaration is contained in the Foreign Trade Statistics Regulations (issued under the authority of Chapter 9 of Title 13, United States Code (76 Stat. 951) which may be purchased from the Superintendent of Documents, United States Government Printing Office, Washington, D.C. 20402. Additional copies of the Correct Way to Fill Out the Shipper's Export Declaration may be obtained free of charge from Collectors of Customs, Department of Commerce Field Offices, the New York Office of the Economic Operations Division, or Washington office of the Foreign Trade Division, Bureau of the Census.

24. COMPLIANCE WITH EXPORT CONTROL REGULATIONS

In preparing and filing export declarations, shippers must comply with all pertinent export control regulations published in the Comprehensive Export Schedule of the Bureau of International Commerce. Information concerning export control regulations may be obtained from the Bureau of International Commerce, Washington, D.C., 20230, or from the Department of Commerce Field Offices.

Space limitations preclude further discussion of applicable provisions in this publication. It is particularly important that the Foreign Trade Statistics Regulations and/or the Comprehensive Export Schedule be consulted for more complete treatment of these items.

Schedule C.—Classification of Country Designations Used in Compiling the United States Foreign Trade Statistics

Schedule C code number	Foreign trade statistics country designations with countries, adjacent provinces, territories, islands and other areas included under the foreign trade statistics country designation	Abbreviated country designations ¹ frequently shown in FT reports
	NORTH AMERICA	
	Northern Area:	
101	Greenland (Danish).....	Greenld
122	Canada.....	Canada
	Yukon; Northwest Territories; British Columbia, including Vancouver Island and Queen Charlotte Islands; Alberta; Saskatchewan; Manitoba; Ontario; Quebec, including Magdalen Islands and Anticosti Island; Newfoundland, including Labrador; New Brunswick, including Grand Manan Island and Campobello Island; Prince Edward Island; and Nova Scotia, including Cape Breton Island.	
161	Miquelon and St. Pierre Islands (French).....	Miquel
	Southern Area:	
201	Mexico.....	Mexico
	Including Cozumel and Revilla Ggedo Islands.	
	Central America:	
205	Guatemala.....	Guatmal
208	British Honduras.....	Br Hond
211	El Salvador.....	Salvadr
215	Honduras.....	Hondura
	Including the Bay Islands.	
219	Nicaragua.....	Nicarag
223	Costa Rica.....	C Rica
225	Panama.....	Panama
227	Canal Zone.....	Canal Z
	Bermuda and Caribbean:	
232	Bermuda (British).....	Bermuda
236	Bahamas (British).....	Bahamas
	Including Harbor Island, Long Island, and the islands Andros, Abaco, Grand Bahama, Providence, Great Inagua, Eleuthera, and several smaller islands.	
239	Cuba.....	Cuba
	Including Isle of Pines.	
242	Jamaica.....	Jamaica
	Including the Turks, the Caicos, and Cayman Islands, and the Morant and Pedro Cays.	
245	Haiti.....	Haiti
	Including Gonave and Tortuga Islands.	
247	Dominican Republic.....	Dom Rep
248	Leeward and Windward Islands (British).....	Lw Ww I
	Leeward Islands. Including the islands of Antigua, Barbuda, Redonda, St. Christopher (St. Kitts), Nevis, Anguilla, Montserrat, and the British Virgin Islands with Sombreira, Tortola, Anegada, Jost Van Dykes, and Virgin Gorda.	
	Windward Islands. Including the islands Grenada, St. Vincent, St. Lucia, Dominica, and the Grenadines with Carriacou, Union, Cannouan, etc.	
272	Barbados (British).....	Barbado
274	Trinidad and Tobago.....	Trinid
277	Netherlands Antilles (formerly Curacao, N.W.I.).....	N Antil
	Including Curacao, Aruba, Bonaire, Saba, St. Eustache (St. Eustatius), St. Martin (southern part).	
283	French West Indies.....	F W Ind
	Including the islands Desirade, Guadeloupe, Les Saintes, Martinique, Marie Galante, St. Martin (northern part), and St. Bartholomew.	
	SOUTH AMERICA	
	Northern Area:	
301	Colombia.....	Colomb
307	Venezuela.....	Venez
312	British Guiana.....	B Guian
315	Surinam (Netherlands Guiana).....	Surinam
317	French Guiana.....	F Guian
	Western Area:	
331	Ecuador.....	Ecuador
	Including the Galapagos Islands.	
333	Peru.....	Peru
335	Bolivia.....	Bolivia
337	Chile.....	Chile
	Including the islands Sala-y-Gomez, Juan Fernandez, San Felix, San Ambrosio, and Easter Island.	

See footnotes at end of Schedule.

INTRODUCTION TO SCHEDULE B

This schedule supersedes the January 1, 1958 edition of Schedule B as the official schedule of commodity classifications to be used by shippers in reporting their export shipments on the Shipper's Export Declaration (Commerce Form 7525-V) and for use in compiling and reporting the statistics on exports of merchandise from the United States, beginning January 1, 1965. This new schedule represents a substantial change from the 1958 edition and previous editions of Schedule B. Changes have been made in the basic outline and arrangement of the schedule as well as in the coverage of some of the individual classifications.

The reporting numbers for all commodities have been revised in this new Schedule B. Effective January 1, 1965, shippers are required to report commodity information on the Shipper's Export Declaration in terms of the new 7-digit codes presented in this schedule.

INFORMATION REGARDING THE 1965 EDITION OF SCHEDULE B

Purpose of the New Schedule B

This new edition of Schedule B has been developed with the primary objectives of instituting a classification system providing for those detailed classifications or "building blocks" which would permit rearrangement of the United States export statistics for comparison with the foreign trade statistics of other countries as well as with data on domestic production. The Standard International Trade Classification, Revised (published by the United Nations as Statistical Papers - Series M, No. 34 and Series M, No. 38) is the general structure within which this new Schedule B has been cast. In line with the "building blocks" concept, additional classifications have also been included to meet United States trade needs and to provide greater comparability with domestic production statistics based on the Standard Industrial Classification of the United States (as revised effective January 1, 1963).

Description of the New Classification System

As in the case of the Standard International Trade Classification, Revised, the January 1965 edition of Schedule B consists of 10 major sections. The approximately 3,600 detailed commodity numbers in the new Schedule B are 7-digit codes of which the first digit is the same as the SITC section (1-digit) code. The first two digits of the 7-digit Schedule B codes are SITC division (2-digit) codes, while the

first three digits of the 7-digit codes are SITC group (3-digit) codes. At the 1-, 2-, and 3-digit levels, therefore, the numbering system of Schedule B is essentially that of the SITC.

The SITC at the most detailed level (5-digit) represents the starting point in the development of the classifications in this new Schedule B. The 5-digit SITC classifications are used as such, or adapted to reflect United States export trade characteristics. The modifications of the SITC for this purpose have been made in such a way as to facilitate conversion of the data to the commodity classifications used for presenting data on domestic output based on the Standard Industrial Classification.

The 7-digit codes in the new Schedule B were derived from the SITC by:

- (a) adopting 5-digit SITC without adjustment;
- (b) adopting 5-digit SITC and making breakdowns to more detailed classifications within the original 5-digit SITC;
- (c) combining 5-digit SITC without further breakdowns, and;
- (d) combining 5-digit SITC classifications, and then making breakdowns to more detailed classifications within the SITC combinations.

Over one-half of the 1,312 five-digit classifications in the SITC fall in (a) and (b) above. The revised Schedule B classifications are essentially comparable to the SITC in these cases. Since two or more 7-digit classifications in Schedule B may have the same first five digits (the SITC item number), it is the sum of the coverage of all of the 7-digit classifications having the same first 5-digits which is comparable to the coverage of the 5-digit SITC item number. However, because of adjustments which were required to be made in devising the new Schedule B, at the 5-digit level of classification there are some differences between the codes in the SITC and those in the new schedule. A table showing the principal differences is included in this schedule. This table lists the 5-digit SITC codes and shows the arbitrary 5-digit Schedule B codes in which they are included.

Concordances Between Old and New Schedule B Numbers

Concordances between the old and new Schedule B numbers are included in this schedule to assist users in making comparisons between the classifications which were formerly in effect and those established effective January 1, 1965. One listing, which is arranged in the order of the old (1964) Schedule B

numbers, shows the new (1965) number or numbers under which items formerly classified under the old number are now included. Where only one new number is shown opposite an old number, all of the items previously classified under the old number are now included in the new number. In such cases, it is possible that the new number may also include items from other old numbers. Another listing, which is arranged in the order of the new commodity numbers, shows each old number from which the new number is derived. In those instances where the items formerly classified under an old number are now classified under two or more new numbers, an asterisk appears following the old number.

SCHEDULE B REPORTING REQUIREMENTS AND DIRECTIONS FOR LOCATING THE CORRECT COMMODITY CLASSIFICATION

Statistical Requirement for Reporting Schedule B Information on the Shipper's Export Declaration

In preparing Shipper's Export Declarations (Commerce Form 7525-V) for merchandise exported from the United States, it is the exporter's responsibility to insert in Column 13 of the declaration the Schedule B commodity number for the item being shipped. The number is obtained by locating in Schedule B the individually numbered classification under which the item is correctly classified. General information as to the manner in which the correct classification can be located in Schedule B is given in the following explanation as well as information about special provisions for the classification of certain types of items. The export declaration form is reproduced and questions and answers on the "Correct Way to Fill Out the Shipper's Export Declaration" are given on other introductory pages of this schedule.

How to Locate the Schedule B Commodity Number for an Item

The listing of section and division descriptions which appears preceding the detailed classifications in this schedule may provide an indication of the page on which the 7-digit code for a particular commodity may be found. To further assist in locating the commodity number for a particular item, an alphabetic index is also included in this schedule. In referring to the alphabetic index, an attempt should first be made to locate a listing for the noun in the name of the commodity, unless the noun is one which you would not normally expect to find in an index. Listings are provided for general nouns, such as outergarments, as well as specific ones, such as dresses, but it is usually best to look first for the specific noun and refer to a more general one only if the specific noun is not listed. Some nouns appear in the index in both the singular and the plural form, and the two forms are sometimes separated by other listings which come between them in the alphabetic arrangement of items. Therefore, it may be necessary to look for both the singular and plural forms of a noun in order to locate a listing for a particular item. If no listing is located for either the specific

noun or any of the general nouns which cover the commodity, then look in the index for the principal adjective which describes the item.

When a listing for the item to be classified has been located in the index, reference should then be made to the page number given for it. (It may also be necessary to refer to the preceding and following pages.) The section title at the top of the page should be read first, then the major headings, until the applicable heading is located. The commodity descriptions for the detailed classifications under this heading should then be read until the correct one is located. Do not assume that you have found the correct Schedule B number when it appears that you have found your item among the specific listings. The same listing sometimes appears under more than one commodity number. Therefore, it is advisable to read descriptions for neighboring Schedule B numbers after it appears that the correct number has been found even if a specific listing appears for the item, because there may be only slight differences between the descriptions for individual Schedule B numbers. In many instances, directives are provided either following the classification description or in the headings. They will frequently provide a guide to the correct commodity number if the one which has been located is not the right one.

It is emphasized that the index is intended solely to assist users in locating the page or pages in the schedule on which to look for the classification which covers the item being classified. The appearance of only one listing in the index for an item does not indicate that it is covered by only one classification. It may be covered by several classifications on the page indicated, on the preceding or following pages or elsewhere in the schedule. Failure to find an item clearly reflected in the index does not relieve the shipper of responsibility for locating the Schedule B number which is correct for the item he is exporting.

Items not Listed Specifically in the Schedule

If the item to be classified is a machinery or equipment part, read the explanation given below under the heading "Classification of Parts of Machinery, Equipment, and Other Commodities." If it is not a machinery or equipment part, and cannot be readily located in the index by the method described above, a further effort should be made to locate a listing under which the item would be included. The index should be examined to locate other names for the item, if there are any, or names of related items, or the names of general types of commodities which would cover the item to be classified, including the classes for the material of which it is chiefly made. If no classification can be found under which the item is specifically listed, it should be classified under the most specific number which can be located after a careful review has been made of all possible classifications which might apply.

The listings of individual items included within a given Schedule B classification are not intended to be complete or exhaustive. Also, some listings of items

which were included in the previous edition of Schedule B may not appear in this new edition, although a considerable effort has been made to include as many as possible. Therefore, it is emphasized that items not listed by name in the schedule are to be classified in the most specific Schedule B number which includes them in its description.

Schedule B Numbers Carrying the Limitation "N.E.C." (Not Elsewhere Classified)

If a specific Schedule B number has been located under which the commodity being classified will otherwise fit but the description carries the limitation "n.e.c." (not elsewhere classified), the commodity number should not be used until a check has been made to determine whether there is a classification elsewhere into which the item will fit more specifically. Other classifications under the same general heading should be examined and, by referring again to the index, it may be possible to locate a classification elsewhere which will cover the item more specifically. It is necessary to make a further search even if the item is listed by name under a Schedule B number which appears to cover it but bears the "not elsewhere classified" limitation. In other words, although the phrase "n.e.c." appears only in the description for the commodity number, it should be considered as being applicable to any item listed under the classification.

CERTAIN CLASSIFICATION PRINCIPLES AND CONCEPTS

Items of Mixed Materials

The material of which items are made is, in many instances, one of the factors in determining their correct classification. This is true of textile fabrics and manufactures, and it is also true of many finished items which are customarily made, for example, sometimes of wood, sometimes of plastic materials, and sometimes of metal. When such items are made of mixed materials, they are to be classified according to the materials of which they are chiefly made. In the case of fabrics and all textile materials, as well as some other articles, the determination is to be made on the basis of the material of chief weight. Wherever practical, directives have been inserted on the appropriate pages of the schedule with regard to items of mixed materials. The index to the schedule does not usually list the various possible combinations of mixed materials of which an item may be made, but the user should turn to the page or pages given in the index for material of which it is chiefly made.

Used or Secondhand Items

When classifying a used or secondhand item, reference should be made to the index to find the Schedule B number which covers the item by name. When this classification has been located in the schedule, it may specify "new". In that event, near-by classifications should be reviewed to find the one which includes "used." If the classification does not specify "new" and if no directive can be found which tells

where "used" or "secondhand" items are to be reported, the used or secondhand item is included under the same Schedule B number as the new.

Classification of Parts of Machinery, Equipment, and Other Commodities

All exportations of complete units of machinery, equipment or other commodities, whether shipped as assembled units or as unassembled parts, and shipments of machines which are almost complete (i.e., sufficient parts are being exported so that the main essential features of the machine are fulfilled) should be reported under the classification for the complete machine. (The reporting of some shipments of motor vehicles, codes 732.0110-732.9200, represents an exception to this general rule. The commodity descriptions and directives for the commodity numbers in this group indicate the manner in which such shipments are to be reported.)

In general, parts which are clearly identifiable as specialized to or mainly for use with a particular machine or apparatus, or with a group of machines or apparatus, are reported under the same classification as that particular machine or apparatus (or, under a separate classification where such a classification is provided for parts). This rule, however, does not apply to parts which in themselves constitute a commodity covered by a particular classification. These are reported under their own appropriate classification even if especially designed as part of a specific machine or apparatus. For instance, roller bearings for electric locomotives, if they are separately consigned, should be reported as "roller bearings" with the appropriate 7-digit number provided for such bearings under codes 719.7030-719.7060 if unmounted or code 719.9310 if mounted, and not as parts of railway locomotives. Similarly, exports of steam generating power boilers, when shipped as a separate transaction, should be reported under the appropriate number provided for such boilers under codes 711.1010-711.1050, even though the boilers may be clearly constructed to form an integral part of a particular machine or vehicle.

Exception to the rules given above:

When parts are shipped for use on a particular type of machine or piece of equipment and some of the parts in themselves constitute a commodity for which a specific classification is provided while others are classifiable under the general "parts" classification for the particular machine or piece of equipment, it is permissible to report the items which in themselves constitute a commodity covered by a specific classification with the commodities classifiable under the general "parts" classification for the particular machine or piece of equipment, provided the items for which an exception is desired do not require a validated license for exportation to the intended destination (see Department of Commerce Comprehensive Export Schedule) and (a) the value of each such item is less than \$1,500 and less than 5 percent of the total value of the shipment, or (b) the value of each such item is less than \$100, irrespective of the total value of the shipment.

When reporting exports of parts of machinery or other commodities, all possible classifications should be considered and the major headings and directives as well as the descriptions for such classifications should be carefully reviewed before a decision is made regarding the 7-digit code to be used.

Classification of Equipment, Parts, and Accessories Exported as Scrap

Machines, equipment, vehicles or apparatus, or parts or accessories therefore, should be described and classified as scrap on the Shipper's Export Declaration when they are being sold or shipped as scrap metal or when the known direct end use abroad is for scrapping (remelting for use in new production). This rule applies whether the physical characteristics or method of packaging identifies the items as scrap, or whether the items being shipped are in their original form or substantially their original form. The nature of the transaction as it is understood by the exporter and as reflected in the commercial documents covering the transaction is the basic criterion in classifying such shipments as scrap.

The description on the Shipper's Export Declaration, in addition to identifying the shipment as scrap, should specify the metal of which the item or items are made, and the Schedule B number for the appropriate classification for scrap of that metal should be shown in Column 13.

Classification of Metal Shipping Containers in Which Commodities are Exported

Attention is called to the classifications which are provided for specified types of metal containers for storage and transport. In this new edition of Schedule B, a separate commodity number, code 692.9999, is provided for filled or unfilled metal shipping containers which are moving in and out of the United States as instruments of international trade. This number is to be used for containers of domestic or foreign manufacture, exported empty and returned filled or exported filled and returned empty or filled, when moving as instruments of international trade. Shippers are cautioned to carefully read the directives for the commodity numbers covering metal containers for storage and transport.

Classification of Military-Type Equipment

In the case of some commodities (notably, clothing) items of a military type are classified separately from similar items which are other than military. However, in many cases military-type items are not classified separately but are included in the same classifications with shipments of the same commodity for other uses. Shippers of military-type items may find some of them covered by listings in the index which indicate "military." For military-type items not so listed, locate the Schedule B number which covers the item by name. If there is no directive on the page where that Schedule B number appears giving information as to the Schedule B number for military-type items, the military shipment is to be included under the

Schedule B number which covers the commodity by name. (For purposes of Schedule B classification, "military" means manufactured to military specifications.)

Commodities Donated for Relief or Charity by Individuals or Private Agencies

Separate classifications are provided in the schedule for exports of certain commodities donated for relief or charity by individuals or private agencies. In general, such classifications are provided for those commodities which are known to be, or are likely to be, exported for relief or charity in fairly sizeable amounts. The classes which are provided for shipments of this type are as follows:

- 022.2030 - Nonfat dry milk
- 023.0010 - Butter
- 023.0030 - Anhydrous milk fat
- 024.0010 - Cheese and curd
- 041.0010 - Unmilled wheat, including
spelt or meslin
- 042.2010 - Milled rice
- 044.0010 - Unmilled corn
- 046.0010 - Wheat flour
- 047.0210 - Corn meal
- 048.1110 - Breakfast cereals prepared
for cooking
- 054.2005 - Dried beans, except for seed
- 091.0040 - Shortening
- 099.9900 - Food, donated for relief or
charity by individuals or
private agencies, not elsewhere
classified
- 421.2030 - Soybean salad oil
- 421.3030 - Cottonseed salad oil
- 421.8030 - Other salad oils
- 499.9900 - Oils and fats, not elsewhere
classified
- 549.9900 - Medicinal and pharmaceutical
products
- 849.9900 - Clothing (new clothing exported
for relief or charity by individuals
and private agencies and all used
clothing for relief or charity
whether exported by individuals,
private agencies or government
agencies)
- 931.0020 - Commodities donated for relief
or charity by individuals or
private agencies, not elsewhere
classified

In all cases, exports of commodities donated for relief or charity by individuals or private agencies should be reported under one of the classes listed above and not under other commodity classifications in the schedule. Commodity number 931.0020 should be used only in those cases where a more specific number has not been provided. The classes listed above should not be used for shipments by government agencies (United States, foreign or international) even

though the shipments may be described as exported "for relief or charity", except for shipments of used clothing by government agencies which are included under commodity number 849.9900. All other shipments for relief or charity by government agencies are to be reported along with regular commercial shipments under the applicable classification for the commodity being exported.

Classification for Reporting the Value of Repairs and Alterations

In the 1965 edition of Schedule B, a classification has been established for the value of repairs and alterations. Under this classification (commodity number 931.0010), shippers should report the value of repairs and alterations made on articles exported from the United States after having been imported for such purposes. The value to be reported should represent the total value of processing in the United States, including the value of parts and labor. The value of the article which was imported to be repaired or altered should not be included in the value reported for commodity number 931.0010.

Classification of Toys

When classifying exports of toys, reference should be made to the commodity classifications under group code 894. In general, toys are not intended to be reported under classifications for items which have the same name but are not toys. For example, toy trucks are not to be reported as trucks (codes 732.0204 through 732.0292).

Classifications With Double Units of Quantity

For some commodities (principally textiles), shippers are required to report net quantity information in two units, such as pound and square yard. For such commodities, two consecutive reporting numbers are provided in the schedule. Net quantity information for each reporting number is required to be shown on the Shipper's Export Declaration in the specified unit. Value is required to be reported only with the number which has a superior "v" shown following the unit of quantity.

Items Valued Less Than \$100

When classifying shipments valued less than \$100 or shipments including items valued less than \$100, reference should be made to Schedule B number 931.0030. This number is to be used by shippers when reporting exports of general merchandise valued at less than \$100, except where the shipment requires a validated export license. The conditions under which commodity number 931.0030 is to be used are outlined in the directives given in the schedule for this classification.

Trademarks and Brand Names in Schedule B

The lists of export commodities, under the numbered classifications herein, include some trademarks and brand names, either alone or coupled with the common commercial identification or description of the commodity. The inclusion of trademarks and brand names in Schedule B results from the practice of sometimes referring to commodities being exported in terms of such marks rather than in terms of more complicated and technical specifications which otherwise might be necessary for proper classification in the Schedule B categories. A substantial proportion of Shipper's Export Declarations are prepared by clerks or other nontechnical employees of export houses, freight forwarders, etc., who must rely on the designation of the commodity appearing on commercial papers such as invoices and who cannot be expected to know in all cases the detailed technical specifications of products solely designated by trademarks or brand names in such commercial papers. Commercial invoices and the Shipper's Export Declarations which are prepared from them, therefore, frequently refer to export shipments solely in terms of trademarks or brand names such as Cosmoline, Satina, Renuzit, etc. Without the inclusion of such trademarks in Schedule B it would be difficult to classify shipments of such products in their proper Schedule B classifications.

The Bureau of the Census is cognizant that such trademarks and brand names identify the products of specific manufacturers and that trademark owners may be genuinely concerned that their trademarks and brand names may, through indiscriminate use, become common names or "generic designations" for the products in connection with which they are used. The United States Patent Office has compared the lists of export commodities in Schedule B with the trade mark registrations which are in full force and effect in that Office, and a real effort was made to identify by a symbol and footnote all marks presently registered in that Office which appear in the numbered classifications in Schedule B. If, through inadvertence, a trademark registered in the United States Patent Office appears in Schedule B without such identification, the owner of such mark should notify the United States Patent Office, Trademark Operation, so that correction may be made in future printings.

The inclusion of trademarks and brand names (registered or unregistered in the U.S. Patent Office) in the lists of export commodities herein is necessitated by practical considerations of administration as stated above and in no case should such inclusion be considered as prejudicing, or having, or intending to have, any adverse effect upon the rights of the trademark owner.

Schedule B Units of Quantity and Conversion Factors

Unit of quantity	Abbrev.	Unit of quantity	Abbrev.
Bale, see Running bale		M (1,000) board feet.....	M bd.ft.
Barrel.....	Bbl.	(a) Hardwood sawlogs, veneer logs and bolts in Scribner Scale (except dogwood and persimmon, and lignum-vitae, and stumps and burls.) Multiply M bd.ft. Doyle or Doyle-Scribner Scale by 1.1 to obtain Scribner. (Conversion factor based on logs 27 inches or less in diameter.)	
(a) Cement—4 bags to a barrel of 376 pounds		(b) Softwood sawlogs, veneer logs and bolts in Scribner Scale. Multiply m. bd.ft. Brereton Scale by 0.55 to obtain Scribner.	
(b) Jet fuels—barrel of 42 gallons		(c) Dogwood, persimmon and lignum-vitae sawlogs, veneer logs and bolts:	
(c) Petroleum and products—barrel of 42 gallons		(1) Dogwood and Persimmon: One short ton equals approximately 280 bd.ft.	
Bushel.....	Bu.	(2) Lignum-vitae: One short ton equals approximately 180 bd.ft.	
(a) Barley—48 pounds to a bushel		(3) Hardwood stumps and burls: One short ton equals approximately 200 bd.ft.	
(b) Corn—56 pounds to a bushel		(d) Railway crossties and mine ties: One tie equals approximately 35 bd.ft.	
(c) Flaxseed—56 pounds to a bushel		M cubic feet.....	M cu.ft.
(d) Grain sorghums—56 pounds to a bushel		(a) Natural gas—M cubic feet at base pressure of 8 ounces above atmospheric pressure of 14.4 pounds per square inch, base and flow temperature of 60 F and corrected for specific gravity	
(e) Oats—32 pounds to a bushel		(b) Natural gas—50 pounds approximate weight per 1,000 cubic feet	
(f) Rye—56 pounds to a bushel		Million Units.....	Million units
(g) Soybeans—60 pounds to a bushel		Number.....	No.
(h) Wheat—60 pounds to a bushel		Pack (cards).....	Pack
Carat.....	Carat	Pair.....	Pr.
Content gram.....	Cnt. gram	Pencil gross.....	Pencil gross
Content pound.....	Cnt. lb.	Pencil slats sufficient to make one gross of pencils	
Content short ton.....	Cnt. s. ton	Pound.....	Lb.
Content troy ounce.....	Cnt. t. oz.	Proof gallon.....	Pf. gal.
Cord.....	Cord	Ream.....	Ream
(a) One cord equals 128 cubic feet stacked or 245 cubic feet of chips		Abrasive paper and cloth—different sizes of sheets, pads, rolls, disks, or belts to be reduced to reams of 480 standard sheets 9 by 11 inches	
(b) One unit of chips equals 200 cubic feet or 81.6 percent of a cord		Running bale.....	Running bale
Cubic foot.....	Cu.ft.	Set.....	Set
Dozen.....	Doz.	(a) Cooperage heading—two heads (top and bottom)	
(a) Glassware—sets of glassware should be reported in dozen pieces		(b) Cooperage shocks—sufficient staves, headings and hoops for one barrel, hogshead, or cask	
Dozen pair.....	Doz. pr.	(c) Cooperage staves—sufficient staves for one barrel, hogshead, or cask	
Foot.....	Ft.	Short ton (2,000 lbs.).....	S. ton
Gallon.....	Gal.	Wood pulp—air-dry weight	
Gram.....	Gram	Squares.....	Squares
Gross.....	Gross	Asphalt and tar roofing and siding—coverage of 100 square feet	
Hundredweight (100 pounds).....	Cwt.	Square foot.....	Sq. ft.
Linear foot.....	Lin. ft.	Square yard.....	Sq. yd.
Long ton (2,240 lbs.).....	L. ton	Troy ounce.....	T. oz.
M (1,000).....	M	Wine gallon.....	Wine gal.
Conversion factors for refractory brick and shapes:			
Kind of brick or shape	Approximate weight per 1,000 bricks, 9" equivalent (pounds)		
Chrome and chrome-magnesite	11,500 lbs.		
Magnesite and magnesite-chrome	10,500 lbs.		
Silica	6,300 lbs.		
Fireclay except high alumina	7,500 lbs.		
Mullite	10,000 lbs.		
Sillimanite	16,700 lbs.		
Other high alumina	9,000 lbs.		
Fused alumina	10,500 lbs.		
Silicon carbide	9,400 lbs.		
Fosterite	9,400 lbs.		
Zircon	13,000 lbs.		
Insulating brick	2,700 lbs.		

Steel Grade and Product Classifications

The following data provide a convenient reference to explain the classification of certain steel mill products in which the dominant factors in determining such classifications are limitations of grade thickness and width. These classifications are based on the best information available as to the Steel Industry's customs and practices in classifying these steel products.

Steel Grade Classifications

Carbon Steel - Steel is considered to be carbon steel when no minimum content is specified or required for aluminum, boron, chromium, cobalt, columbium, molybdenum, nickel, titanium, tungsten, vanadium or zirconium, or any other element added to obtain a desired alloying effect; when the specified minimum for copper does not exceed 0.40 percent; or when the maximum content specified for any of the following elements does not exceed the percentages noted: manganese, 1.65; silicon, 0.60; copper, 0.60.

Alloy Steel Including Stainless - Steel is considered to be alloy steel when it includes one or more of the following elements in the designated amounts: manganese in excess of 1.65 percent, silicon in excess of 0.60 percent, and copper in excess of 0.60 percent. It also includes steel containing the following elements in any amount specified or known to have been added to obtain a desired alloying effect: aluminum, boron, chromium, cobalt, columbium, molybdenum, nickel, titanium, tungsten, vanadium, zirconium, and other alloying elements.

Alloy Steel Except Stainless - Any alloy steel not meeting the specifications given below for stainless steel.

Stainless Steel - Steel is considered to be stainless steel when it contains 10 percent or more of chromium, with or without other alloys, or a combined content of 18 percent or more of chromium and other alloys.

24 to 38 Incl.	PLATE	SHEET ¹	SHEET	SHEET
Over 38	PLATE	SHEET	SHEET	SHEET

¹Polished Finishes #4 and up, classify as SHEET.

Due to the differences between the size classifications set forth in the above tables and the dimensions specified for similar products in the SITC, comparability on a 5-digit level between the SITC and Schedule B will be reduced in the following commodity areas:

67323

67324

67443

67444

67480

67503

67504

Comparability on a 5-digit level for wire (67703 and 67704) will also be lessened since the SITC specifications for wire cut across the Schedule B commodity specifications for strip and bars.
